lang="EN-ZA">TCPView is a Windows program that will show you detailed listings of all TCP
and UDP endpoints on your system, including the local and remote addresses and state of TCP
connections. On Windows Server 2008, Vista, and XP, TCPView also reports the name of the
process that owns the endpoint. TCPView provides a more informative and conveniently
presented subset of the Netstat program that ships with Windows. The TCPView download
includes Tcpcvcon, a command-line version with the same functionality.</p> <p
